PROFESSIONAL SUMMARY

GenAI Developer with hands-on experience architecting multi-agent AI systems, LLM chatbots, and RAG pipelines using LangChain, LangGraph, LlamaIndex, and OpenAI APIs. Experienced in taking GenAI systems to production: LLM observability and tracing (LangSmith, Langfuse), monitoring with Prometheus/Grafana, scalable backend development with FastAPI, Redis, and Docker, and MLOps/ETL orchestration with Apache Airflow and MLflow. Proficient in LLM inference optimization (vLLM, Ollama, fine-tuning, quantization), computer vision (YOLOv8, PyTorch), Linux administration, and CI/CD automation.

EXPERIENCE

Finrapt Technologies Private Ltd
GenAI Developer

Hyderabad, Telangana
May 2025 – Present

- Architected and maintained a multi-agent transaction chatbot for multi-turn conversations using LangGraph, LangChain, and OpenAI APIs, improving response accuracy and reducing context loss by 30%.
- Instrumented production LLM pipelines with LangSmith and Langfuse for end-to-end trace/prompt observability, and built Prometheus + Grafana dashboards to monitor latency, token usage, and error rates, cutting incident detection time.
- Designed and orchestrated end-to-end ETL and model training pipelines with Apache Airflow and MLflow, reducing manual deployment effort by 40%.
- Built CI/CD workflows for FastAPI model serving; deployed and optimized LLM inference with vLLM and Ollama, lowering inference latency by 25%.
- Deployed and administered self-hosted GitLab on Linux servers; implemented user provisioning workflows integrating Linux user/group policies with Active Directory.
- Tech Stack: Python, LangChain, LangGraph, LlamaIndex, OpenAI APIs, LangSmith, Langfuse, Prometheus, Grafana, FastAPI, Redis, Docker, Apache Airflow, MLflow, vLLM, Ollama, GitLab, Linux.

Finrapt Technologies Private Ltd
Python Developer Intern

Hyderabad, Telangana
March 2025 – May 2025

- Developed a real-time face and identity verification platform using YOLOv8, boosting authentication accuracy by 20%.
- Refactored legacy Java modules into Python and built high-throughput FastAPI backend services, improving maintainability by 35%.
- Tech Stack: Python, Java, FastAPI, YOLOv8, PyTorch, Linux, Active Directory.

TECHNICAL SKILLS

- Languages: Python, SQL, C, Java (Basic)
- Generative AI & Agentic AI: LangChain, LangGraph, LlamaIndex, OpenAI APIs, Prompt Engineering, Multi-Agent Systems, RAG Pipelines
- LLM Deployment & Optimization: vLLM, Ollama, Fine-Tuning, Quantization, Model Serving, Inference Optimization
- LLM Observability & Production AI: LangSmith, Langfuse, Prometheus, Grafana, OpenTelemetry, Weights & Biases (W&B), Evaluation/Eval Pipelines
- Backend & Microservices: FastAPI, REST APIs, Uvicorn/Gunicorn, Microservice Architecture, Redis
- MLOps & Data Engineering: Apache Airflow, MLflow, ETL Pipelines, Experiment Tracking
- Machine Learning & Computer Vision: PyTorch, TensorFlow, YOLOv8, Deep Learning, Image Processing
- DevOps & Deployment: Docker, CI/CD Pipelines (GitHub Actions/GitLab CI), Containerization, Linux
- Databases: PostgreSQL, Redis

PROJECTS

Multi-Agent Transaction Chatbot System

FastAPI, Redis, OpenAI, LangGraph, LangChain, LangSmith

- Architected a multi-agent transaction chatbot leveraging LangGraph and LangChain for dynamic task orchestration, with LangSmith tracing for debugging and quality evaluation.
- Engineered Redis-backed memory management to preserve agent state and conversational context.

Automated ETL and Model Training Pipeline

Apache Airflow, MLflow, Python, Docker, Prometheus

- Orchestrated a scheduled ETL workflow using Apache Airflow to aggregate data from distributed microservices, with Prometheus-based pipeline health monitoring.
- Built an end-to-end ML training and experiment tracking framework using MLflow.

Real-Time Vehicle Detection and Tracking System

YOLOv8, ONNX, Computer Vision, Python, OpenCV

- Architected a real-time vehicle detection and tracking solution using YOLOv8 for traffic and surveillance analytics; converted models to ONNX for lightweight edge deployment.

EDUCATION

Centurion University

Vizianagaram, AP

Bachelor of Science in Computer Science and Artificial Intelligence

July 2022 – March 2025

GPA: 8.8 / 10.0 – Relevant Coursework: Data Structures, Machine Learning, Deep Learning, Computer Vision, Model Fine-tuning.
